Hand-held Indirect Ophthalmoscope, MONOCULAR

An unusually compact instrument, which is recommended for visits and mobile use.

- **Durable metal construction.** Long working life.
- **Built-in interference red-free filter.** Improves contrast.
- **All optical components made of coated optical glass.** Precise image and high light intensity.
- **Adjustable light beam.** Useful for small pupils.
- **Can be used with one hand.** Easy to reach all the controls with the thumb.
- **+ 3 D lens attachment.** An aid to accommodation, magnifies the image.
- **Add-on binocular attachment available.** Instrument can be updated for binocular use.

Available for use with a 3.5V rechargeable handle or 6V cord handle with desk transformer EN50 or portable mPack. The 6V version is recommended for incorporation into ophthalmic examination units.

Hand-held Indirect Ophthalmoscope, BINOCULAR

The addition of the binocular attachment to the Hand-held Indirect Ophthalmoscope makes stereoscopic examination possible. PD selection from 54 to 74 mm.

- **Symmetrical selection of PD.** Quick and easy to adjust.
- **Multi-coated precision optics.** Exceptional image quality.

Available for use with a 3.5V rechargeable handle or 6V cord handle with desk transformer EN50 or mPack. The 6V version is recommended for incorporation into ophthalmic examination units.

HEINE SIGMA 150º Binocular Indirect Ophthalmoscope

Ophthalmoscope for spectacle and headband, US Pat. 5,815,241

The Spectacle Indirect Ophthalmoscope for any pupil size. Two separate controls let you select the ideal setting for parallax and convergence to suit any pupil. The illumination beam can be adjusted by ± 3° to eliminate reflexes.

- 6 V/5 W XHL Xenon Halogen bulb. Bright, white light.
- Illumination beam adjustable ± 3°. Eliminates reflexes.
- Integrated red-free filter. Versatile, fully-equipped.
- Detachable blue and yellow filters. For Fluorescence Angiography.
- Dust proof. Maintenance-free.
- R.D. selection from 48 to 74 mm. Suits any user.
- Optics on swivel mount. Unrestricted view.
- Extremely light, 90 g without frame. Light and comfortable.
- Carbon Fiber Instrument Frame. Light but very durable.
- Large and small apertures.

HEINE OMEGA 500® Binocular Indirect Ophthalmoscope

A new Dimension in Comfort, Performance and Flexibility

The evolution of the Binocular Indirect Ophthalmoscope. Patented "Synchronized Adjustment of Convergence and Parallax" for high quality, stereoscopic fundus images through any pupil size.

- Built on the market-leading optical performance of the OMEGA 180, the OMEGA 500 has been optimized for even better views of the fundus. Multi-coated illumination system, featuring a new XHL Xenon Halogen Technology bulb, reduces corneal reflexes and ensures clear, high-resolution images of the fundus which are up to 100% brighter.
- Enhanced Small Pupil Function – the patented "Synchronized Adjustment of Convergence and Parallax System" (US Patent # 4,684,227), which allows for the precise selection of observation and illumination optics for any pupil size, has been optimized for even better functionality in small pupils down to 1.0 mm.
- 30% lighter than the OMEGA 180.
- Reduced Volume, 20% less volume than OMEGA 180.
- Registered Design.

Technical Specifications:

- For any pupil size
- Patented Synch. Adjustment
- Exceptionally light
- Dust proof

Apertures and Filters: Can be "locked" into a desired position.
Adjustment Levers: Also feature a "Friction-Clutch" ("Safety-Clutch") to protect mechanisms from forced adjustment while in the "lock" position.
Increased PD Range: From 46–74 mm.
Soft Touch Controls: All key adjustment controls feature soft touch surfaces for precise and positive adjustment control.

Separate fine-tuning of the illumination beam ± 4° in addition to synchronized convergence and parallax adjustment.

HEINE Diffuser, 3 Integrated Spot Sizes: small spot, medium and large. 3 Integrated Filters: Red-free, Cobalt Blue and Yellow filters.

Arrangement and positioning of all adjustment controls ensure intuitive functionality. Dustproof housing and aluminium chassis assure durability and reliability.

The HEINE diffuser can be selected to provide soft light, simplifying the examination and reducing glare and reflexes but maintaining excellent light intensity. Can be combined with all filters.

For information on HEINE power sources see pages 115.
HEINE OMEGA 500® Headband

- **Articulating Hinge** provides vertical adjustment of the rear band of the headband for individual placement. Secure and perfect fit for all shapes and sizes.
- **New Ergonomic design** for optimal weight transfer across the surface of the entire headband (no pressure points).
- **New softer, more malleable material.** Provides even and comfortable fit of the headband.
- **Calibrated Overband Position** ensures optics are in true horizontal position for precise adjustment and alignment.
- **Integrated cables** in overband eliminates the usual “cable loop” from instrument to headband.
- **Increased Cushion Area:** 40% more cushion area than on OMEGA 180.
- **Registered Design.**

**Technical Specifications:**
- **HC50 Headband Rheostat:** Easily mounted on the left or right sides of the headband.
- **Integrated flip-up adjustment:** To raise optics out of the line of sight. Can be mounted on the left or right side of the headband. Optics can be flipped and locked at 0°, 12.5°, 47.5°, 60° degrees.
- **Mechanically reinforced adjustment mechanisms:** For durability and precise adjustment of the headband.
HEINE Synchronized Convergence and Parallax Adjustment System

U.S. Patent # 4,684,227

The advanced, patented One-Step Small and Variable Pupil Control maximizes stereopsis in dilated pupils and allows for the instant adjustment of the optical system to ensure fully illuminated, stereoscopic views through pupils as small as 1 mm in diameter.

- Dilated Pupil. In the case of a dilated pupil, the HEINE Synchronized Convergence and Parallax Adjustment System adjusts the left and right observation paths as far apart as possible (large angle of Convergence) providing for maximum stereopsis (depth perception). The illumination beam is automatically positioned as high as possible relative to the observation plane (creating a large angle of parallax) in order to maximize illumination and minimize unwanted reflections (Illustration 1).

- Undilated Pupils and viewing in the Periphery. In cases of pupils that can not, or should not be dilated, a binocular view with full illumination is not possible without adjustments of the optical system (Illustration 2). By adjusting the Small and Variable Pupil Control Lever located on the bottom of the OMEGA Series instruments, the angle of convergence between left and right observation paths is reduced and the angle of parallax (light path) is automatically reduced in one, simple step. The observer can now enjoy a fully illuminated, binocular view with excellent stereopsis (Illustration 3) even through a pupil as small as 1 mm in diameter, or in cases where the pupil appears as an ellipse as a result of viewing the periphery.

### WIRED OMEGA 500 KITS

Recommended Product Order Configurations to ensure the most flexibility the OMEGA 500 has to offer. The following kits include main system elements but no carrying cases or ancillary accessories.

**Wired Directly into a Stand Kit**
- HC 50 Rheostat, HC 50 Connecting Cord, and HC Converter
  - C-04.33.530

**EN 50 Wall / Table Mount Transformer Kit**
- HC 50 Rheostat, HC 50 Connecting Cord, and EN 50 with Control
  - C-04.33.531

**EN 50 Wall Plug-In Kit**
- HC 50 Rheostat, HC 50 Connecting Cord, and HC Plug-In Transformer
  - C-04.33.532

**mPACK with with Transformer Kit**
- mPACK complete with Transformer
  - C-04.33.533

**mPACK with EN 50 Charging Base Kit**
- mPACK with EN 50 Charging Base
  - C-04.33.534

For information on HEINE power sources see pages 115.
HEINE OMEGA 500® UNPLUGGED

with headband battery (rechargeable) - UNPLUGGED

100 % freedom of movement – no cable connections!
The OMEGA500 ophthalmoscope with UNPLUGGED rechargeable battery allows one-of-a-kind mobility without restriction or hindrance caused by cables, cords, or similar connections. In addition, the OMEGA500 UNPLUGGED is the lightest indirect ophthalmoscope of its kind on the market!

- **Rechargeable battery integrated on the headband.** No interfering cable connections.
- **Lightweight with balanced weight distribution.** High level of comfort. Lightweight and compact.
- **LED charge status indicator.** LED indication of remaining operating time.
- **Can be recharged by wall or plug-in transformer.**
- **Direct operation possible while charging** through the use of the mobile plug-in transformer.
- **Charging time.** 2 hours.
- **UNPLUGGED rechargeable battery.** Operating time 2 hours (with standard bulb 6 V, 5 W).
- **Intelligent charging system.** Automatic changeover from operating to charging mode (in the wall unit). Battery-friendly charging.
- **Top safety standards.** Integrated charge and performance checks during operation. Lithium polymer technology (selected non-flammable materials). UL-compliant.
- **System compatibility with mPack for even greater capacity.**

HEINE OMEGA 200° Ophthalmoscope

Head-worn Indirect Ophthalmoscope with integrated teaching mirrors

The instrument of choice for teaching and operating rooms.

- **Integrated teaching mirrors left and right.** Identical images for the examiner and two observers.
- **Synchronized adjustment of illumination and observation beams.** Instant adjustment allows stereoscopic examination through pupils down to 1.2 mm in diameter.
- **Separate fine-tuning of the illumination beam ± 4°.** Ideal for difficult examinations (e.g. in the periphery.)
- **Quick-action hinged optics.** The optics swing into the stand-by position.
- **Light weight.** Ensures maximum comfort in long term use.
- **Multi-coated precision optics.** Exceptional quality of image and illumination without UV and IR.
- **Complete range of accessories.** Individually-selected instrument kits possible.

- Soft comfortable headband with cushions, adjustable for height and width. Aluminum frame, durable and dustproof.
- Separate fine-tuning of the illumination beam ± 4° in addition to synchronized convergence and parallax adjustment.
- 3 different apertures, integrated red-free and cobalt blue filters.
- Instant adjustment for any pupil size. Aluminum optical frame and dustproof housing assume durability and reliability.
- Integrated teaching mirrors with identical images for the examiner and 2 observers.

For information on HEINE power sources see pages 115.
HEINE Video OMEGA 2C®

Binocular Indirect Video Ophthalmoscope

The only Binocular Indirect Video Ophthalmoscope on the market designed from the ground up for video application. Ideally suited for teaching, research, patient clarification, digital patient history, and telemedicine.

- **High resolution A-Cam camera.** CCD 470,000 Pixel, 460 lines.
- **Image sensor.** 1/2” CCD, color.
- **Fully integrated camera system.** No external brackets or prisms.
- **100 % dustproof system.** No maintenance required.
- **Waterproof camera head.** Can be placed in disinfectant solution (but cannot be autoclaved).
- **Optics specially developed.** Maximum brightness.
- **Focus adjustable for any working distance.** From 250 to 800 mm.
- **Automatic white balance.**
- **Automatic light metering at the center of the image.** Reduction in reflections.
- **Automatic light boost.** Boost function for examinations with low lighting.
- **Processor will connect to various output devices, such as:** VCR’s, digital printers, PC’s with image capture software.
- **Compact.** Lightweight design (65 g, camera head without cable, complete 250 g).
- **Video OMEGA 2C can be supplied without a camera for use with user’s own “C”-mount CCD cameras.**
- **Connecting cable.** 3 m.
- **Brilliant image with an S-VHS monitor.**
- **FBAS (composite) and Y/C (SVHS) outputs.** Extensive compatibility and high image quality.
- **Optional PAL or NTSC format.** Please specify when ordering.

Model Eyes

HEINE Ophthalmoscope Trainer

This model eye was developed for the teaching environment. It is the first adjustable model from HEINE to mimic the human eye. Precise, durable and with a multitude of uses, it simplifies the learning process and encourages the student to practice with the ophthalmoscope.

- Refractive error. Can be set in 1-dpt. steps from - 10 to +10 dpt.
- Diameter of pupil. Variable 2, 3, 4, 5, 6, 8 mm.
- Aspheric optical glass lens. F = 18 mm. Lens curvature matches that of the retina.
- Trainer body. Made of metal – extremely stable and durable.
- Angle of examination. Variable.

Model Eye

Ophthalmoscope Trainer C-00.33.010
Model Eyes

HEINE Skia / Retinoscope Trainer

This model eye is ideal for teaching and practice. The pupil diameter and refractive error can be set exactly and are therefore reproducible. The Front holder accepts up to two trial lenses. The cyl. can be read off the graduated scale.

- **Refractive error.** Can be set to any value in steps of 0.5 dpt from -7 to +6 dpt.
- **Scale.** 0° – 180° for cyl. determination.
- **Diameter of pupil.** Variable 2, 3, 4, 5, 6, 8 mm.
- **Optics.** Optical glass achromatic lens F = 32 mm.
- **Trainer body.** Made of metal – extremely stable and durable.
- **Angle of examination.** Variable.
